

5.4 PERMIT DELIVERY VIA FAX

During the online application submission process, one of the questions was the method of delivery. This question is presented for all types of permits. It also is presented when a State employee performs the data entry for a mailed-in or walked-in permit.

The Department of Revenue may impose a surcharge for a fax delivery. It is the customer's responsibility to ensure that the destination fax machine is operational. Once payment has been received for the permit (or deferred if a bond is in use), the system will queue the permit image for delivery using the Department of Revenue's fax gateway.

Even if a permit has been delivered via fax, if the permit application was submitted online, the user may still download an image of the permit until the permit's expiration date.
